

# MEDIALLEVAMENTO

## ALLEVAMENTO LINE

The Breeding line is produced to meet the specific nutritional needs of brood-mares and colts which are facing a delicate phase of their life and need therefore to intake specific quantities of proteins, fats and fibers.

**Mediallevamento** is particularly suitable for brood or lactating mares and growing foals. As well as barley and oats, the formulation also contains protein, amino acids, vitamins and minerals to support the wellbeing of mares and foals providing them with a complete and nutritionally balanced feed. Thanks to the addition of flakes, this feed is particularly appetising even to yearlings.
